1. The following observations were made at Brandis airfield between 14 and 21 September 19 4:

14 September. About C/CO, two Li-2s took off. At 0715 and 0718, 12 men each parachuted from these aircraft. Until about 0900, 72 parachute jumps were made from an altitude of about 600 meters. There was a 4/10 overcast.

15 September. Beginning 1010, the three Li-2s stationed at the field took off at intervals of 3 minutes for parachuting practices. Twelve men would again jump from each aircraft.

16 September. No flying was practiced. There was a closed ceiling and rain.

17 September. During the afternoon, a Li-2 made a local flight. No parachuting was practiced.

18 September. During the morning, some single-engine monoplanes were seen aloft over the field. No landings were made. Beginning at 1615, the three Li-2s took off at intervals of 3 minutes for parachuting practices. Until 1800, each Li-2 had taken off four times. The soldiers jumped over Trebsen and returned to the field from the barn southeast of Polenz by truck.

19 September. The three Li-2s took off once for parachuting practices. About 1810, one of the aircraft took off a second time. During the day 48 jumps were made. There was bad weather with intermittent rain showers and southwesterly wind of 4 to 6 meters per second. During the morning, 50 to 70 men were seen arranging and packing parachutes near the hangars.

20 September. No flying was practiced. The three Li-2s were parked in front of the hangers.
